Recent Projects

Concert Compass - Managed team coordination in addition to API and front-end development. This app streamlines the discovery of local music events through a responsive search function, an interactive map using Google Maps and Ticketmaster APIs, and user-friendly modals for venue details. Constructed with Tailwind and client-side storage for a polished, interactive, and responsive experience.

Zest - Led UX/UI design and facilitated communication between front-end and back-end code. Zest is a MERN-stack job tracker that empowers users to create accounts, save jobs, update calendars, manage contacts, and set profile pictures. Developed using React, MongoDB, Express.js, and Node.js, along with tools such as Mongoose, Material UI, and a GraphQL API.

Experience
